Springwood Gardens 2018

Springwood Gardens is a family-owned mail order nursery. I specialize in breeding fancy, northern hardy, tetraploid daylilies with great color, many of which are outstanding breeders. There are 9 new introductions for 2017.

The website includes several pictures of each introduction, plus selected offspring if any. You are welcome to use any of the photos without permission. Interested in what might be coming out in the future? Make sure to click on the link called possible future introductions.

As for rust, I haven't seen a spore inside or out since the fall of 2016. The plants you receive will be beautiful, but anything planted in the greenhouse prior to that date may have been exposed and it may show up later in your season. It seems that most people don't care anymore, but if you do, please let me know, as I have a small number of most of my intros growing outside where winter kills it off. I can send those if available, and if not, I can send your order later in the season, or plant your order outside and send May 2019. Thank you for your understanding.

Thank you so much for the nice e-mails about the flowers you receive as well as the pictures of your gardens and seedlings. I love hearing from you. Best wishes,

Karol Emmerich

Springwood Gardens

Blog: www.springwoodgardens.blogspot.com

COLLECTION AND CLUB PRICING: Contact me for discounted pricing if you want all or most of them. Special pricing for club orders for auctions or "baby-sitting" plants (at least twice catalogue value).

GUARANTEE: Springwood Gardens' introductions are guaranteed for a year in zone 4 and higher if: they are planted well before fall frost and grown in normal garden conditions (e.g. grown in the ground rather than in pots, not in standing water, watered as needed, soil not overly compacted); bark or other mulch is put around the plants to keep the roots cool and moist (no extra winter mulching needed); plants are not divided when first received or during the first year. (Note: it's best to avoid dividing or transplanting daylilies when they are stressed by high temps or drought, and northerners report better success dividing daylilies in spring or early summer, rather than in the fall.)

SALES INFORMATION: Each order is important, and I personally choose and box each plant. Plants are state-inspected. Shipping is by priority mail from March 15 to June 30 (although if I have time to ship after that I will). \$12 for the first plant and \$3 for each additional plant. Check or money order should be made payable to Springwood Gardens. U.S. shipments only. **Prices are for a double fan.** I ship large plants, although sometimes the size is weather or cultivar dependent. I promise you will be very happy with the size of your order as a whole ☺ All Springwood introductions have been grown and tested outside before selection. They are not babied or given special care. They are planted on top of a cold, windswept hill with almost no snow cover. The ground around the daylilies is covered with a couple of inches of hardwood bark for weed control. They are given at least an inch of water a week during the growing season and only rarely any fertilizer. During bloom season, nights are typically in the 60's and days in the 80's and 90's, but in making evaluations, I also watch how the flowers open when temps are in the 50's. Most of the dormants are lined out outside. The semi-evergreens are lined out in the greenhouse (where they are grown in the ground in raised beds, receiving only regular fertilizer and water and sprayed for insects as needed), enabling you to receive large, high quality, blooming size plants when it's most convenient for you in the spring. I recognize that not everyone is enamored of plants grown in greenhouses, but in our climate it's often the only way I'm able to ship before early June! Bloom occurs in April and May in the greenhouse, and it is likely you will receive a plant that has already scaped (happy to send scapes for pollen if I have them). Most buyers report first year bloom (and often rebloom) on the majority of the plants that I send, although not usually in sync with their peak bloom time. Northerners will find that their plants will re-establish more quickly if they request delivery after the soil has warmed up in their area and after hard frosts are expected.

VISITORS: Peak bloom outside is usually mid-July through mid-August; peak bloom in the greenhouse is usually mid-April to late May. The greenhouse and garden are open by appointment, and I do formal tours for groups of 8-10 or more.

2018 INTRODUCTIONS

CRADLE OF REFUGE TET 48412 (Desire of Nations x Dawn of Aquarius), 6", 32" (range of 27-33" when mature; 26" in initial bloom year), 4-way branching (with range of 2-6 way) when not crowded (5-way average in initial bloom year and 4.6 way in second year and 3.4 way in 3rd year due to decline in branching on the outer scapes), 20 buds (with range of 9-34) when not crowded (and dropping to 15 average due to decline in branching on the outer scapes when crowded), ML, Dor, some Minnesota instant rebloom some years, fr. Grape cranberry blend; icy gray lavender eye and edge; green throat. Darker and less ruffled in cool weather - see website for pics. Good increaser and no spotting. Good opener in normal temps, but not a CMO and sometimes has a lazy petal when it is cold. Fertile both ways. A big thank you to Dan Robarts, who over the years has carefully studied my plants and thought that these two parents would work well together.....\$75

FINAL CONFLICT TET 39409 (Gnashing of Teeth x sdlg) x Desire of Nations, where the sdlg includes Regal Majesty, Clothed in Glory, Remembering Joan, Heartbeat of Heaven, Breaking My Heart, Shaka Zulu, and Rock of Salvation. 6", 34", 3-way branching (range of 2-3 way), 18 buds, ML to Late, Sev, some Minnesota instant rebloom some years, fr. Gorgeous flowers with no spotting. Almost an EMO. It almost didn't make the cut because it is slow to increase (so I have a very limited supply of it). But it made a stunning clump during its test period once it got going and is the parent of some outstanding kids (see website for pics), so I thought it worth introducing. Dark burgundy with icy gray lavender eye; icy gray lavender plus ivory edge; chartreuse throat. Easily fertile both ways.....\$100

LET NOT YOUR HEART BE TROUBLED TET 40713 Chariot of Clouds x sdlg, where the seedling includes All Things to All Men twice, Repeat the Sounding Joy, blue-eyed sdlg 17305, Heartbeat of Heaven several times, Chariot of Clouds, Filled to Overflowing and Janet Benz. 6", 34" (range of 30-38"), 4-way branching (with range of 3-6 way, and the V's have V's), 25 buds (with range of 16-35), ML, Sev, rebloom (but not MN), fr. Very strong scapes that are not impacted by high winds; lots of buds and no leaning or crowding; consistent blooms that open easily when cold and almost never show a spot. Good increaser and a strong garden flower. It reminds me a bit of Vision of Things to Come (1/2 sib), but with fewer ruffles and lighter color. Pink cranberry to pale pink cranberry depending on the temperature; dark cranberry plus ivory edge; chartreuse throat. Fertile both ways.....\$75

POWER OF PRAYER TET 45612 sdlg x (sdlg x All Things to All Men), where the seedlings include things like Repeat the Sounding Joy, blue eyed 17305, Heartbeat of Heaven several times, Chariot of Clouds, Filled to Overflowing and Janet Benz. 6.5", 32" (26" in first year after planting). 4-way branching, 22 buds (range of 16-37), ML, Dor, instant MN rebloom on half the fans, fr. Cranberry grape; icy gray lavender eye; icy gray lavender plus ivory edge; yellow to green throat. Fertile both ways.\$75

PROMISE OF PEACE TET 31412 {(Repeat the Sounding Joy x sdlg) x All Things to All Men} x (Entwined in the Vine x Gathering of Nations). 6.5", 33" (range of 32-34"), 4-way branching (range of 2-5 way), 20 buds (range of 10-28), ML, Sev, rebloom (but not in MN), fr. A scape on every fan! Showy, ethereal, graceful flowers, with lots of variation in blooms from day to day and bloom to bloom – most are beautiful, but a few are ordinary. Impressive clump. Pale ivory pink; etched multi-lavender eye; triple edge of dark and light lavender and pale butter ivory; yellow to green throat. Fertile both ways. I didn't use it in hybridizing until this year because in the past I couldn't figure out what I had in my inventory to cross it with to make it better or different. Limited.....\$100

PROPHETIC VOICE TET 37512 [{sdlg x (Inscribed on My Heart x Entwined in the Vine)} x (All Things to All Men x sdlg)] x {sdlg x (sdlg x All Things to All Men)}. 6" (up to 7"), 34" (range of 32-34"), 4-way branching (range of 2-6 way), 20 buds when crowded (range of 10-34) and more than 20 when not, M (but long bloom season; blooms here into late August), Sev (but almost dormant), rebloom (but not in MN), fr. Cranberry lavender burgundy blend; burgundy plus icy blue violet lavender eye; icy blue violet lavender edge plus ivory; green throat. Gorgeous on its best days and an outstanding parent for all kinds of looks including ivory patterns (see website for kids). Fertile both ways. Easy pollen parent; more difficult than average pod parent. Very hardy. BUT it is just a bridge plant because it has a lot of bad days when the flower doesn't open fully and it sometimes spots. It is only available as a gift to hybridizers with a \$300 purchase of anything from the catalog – or you are welcome to request Shake, Rattle and Roll, Trials of Job, or Gathering of Nations (which by the way was absolutely gorgeous here this year with a better scape than when it was tested – might have just needed a better location or winter). **This plant is for personal use only and you must promise on your order form not to re-sell or gift any of it.** For those of you who choose it, I'd love to get feedback and pictures. Very limited.

SHAKE, RATTLE AND ROLL TET 20110 (Entwined in the Vine x sdlg) x {Repeat the Sounding Joy x sdlg} x All Things to All Men}. 5” (sometimes larger), 24” (range of 20-24”; some years 22”), 3-way branching (range of 2-4 way), 12 buds (range of 10-17), ML, Dor, rebloom (but not MN), fr. Soft lavender pink; patterned eye with mix of grape and lavender and ivory; triple edge of purple and dark lavender and ivory yellow; green throat. Fascinating patterns in the greenhouse (see website), and outside in Cleveland (catalog picture). Hardy and increases rapidly. Easy pollen parent, but not a super easy pod parent and pods don’t have many seeds. A TERRIBLE garden plant in Minnesota: slow to open, wiry scape, low budcount, and doesn’t always pattern. Because of its weaknesses, I haven’t used it as much as I probably should have. It has made some very interesting kids. Paul Lewis (Cleveland) got it spring 2016 and reports: “It is slow to open but worth the wait. A bridge plant, but I believe it will be a huge stepping stone toward some really cool patterns.” It is available only as a gift to hybridizers with a \$300 purchase of anything from the catalog – or you are welcome to request Prophetic Voice, Trials of Job, or Gathering of Nations. **This plant is for personal use only and you must promise on your order form not to re-sell or gift any of it.** (Note: I have a good supply, so might consider selling it separately if there is any left after gifting, but the same stipulations would apply about no re-sale or gifting).

SONG OF THE SEA TET 48010 {sdlg x (Repeat the Sounding Joy x sdlg)} x Desire of Nations. The seedlings are too complicated to spell out, but include some unexpected things like Jane Trimmer, Storm Shelter, Moses in the Bulrushes. 5.5” (sometimes 6”), 28”, 3-way branching (5-way in the GH), 19 buds (loads more inside), ML, Ev, rebloom (but not in MN), fr. Burgundy; icy dark lavender eye; icy dark lavender plus ivory edge; yellow to green throat. Pictured on its maiden bloom – see website for other pictures. Sometimes has teeth and tendrils. Fast grower. Tested at Mike Darrow’s in West Virginia zone 6 where it has reliable rebloom, performs well in their winters as well as after spring frosts and in dry weather, and gives very rich color to its seedlings (see website). Also tested in Texas where it holds its color well. Easily fertile both ways. I didn’t use it much because it was tender in its initial Minnesota location. Once planted in a more protected spot 15 feet south of the greenhouse, it has performed beautifully. That said, I am reluctant to sell it to anyone in zone 4 or lower (although I’d consider gifting it), and will guarantee it for 2 years in other zones..\$100

SWORD OF JUSTICE TET 26712 [Gathering of Nations x {(Inscribed on My Heart x Chariot of Clouds) x Entwined in the Vine}] x Trials of Job. 7”, 28” (range of 24-30”; 26” some years), 3-way branching (range of 3-6), 15 buds (range of 12-20), ML, Sev, rebloom (but not MN), fr. Lavender pink; burgundy and grape lavender eye (with ivory pattern in cooler weather); triple edge of burgundy and grape lavender and ivory; green throat. Usually a slight reverse bitone. Stunning patterns in the greenhouse – see website. Pictured on a coolish day (70’s), where the probability is high that a pattern will emerge. Colors are also accentuated in cool weather and it is very pretty. If you live where days and nights are always very warm, you might only rarely see it pattern. A super parent, producing hardy kids - the majority of which show patterns (although more reliably when the temperatures are cool). Make sure to check them out on the website© Fertile both ways.....\$125

NOTE: If there is something I have introduced that is not on this list that you have your heart set on, let me know. I often have one or two of a plant available, or I might be able to take it off a display clump – or even divide up a whole clump if I get a lot of requests.

INTROS FROM OTHERS

| | |
|--------------------------------|----|
| OCEAN LOTUS | 50 |
| SCARLET PIMPERNEL | 35 |

Definitions:

- fr = fragrant
- Dor = dormant
- Sev = semi-evergreen
- Ev = evergreen
- Tet = tetraploid
- Re = rebloomer
- EMO = early morning opener
- CMO = cold morning opener
- MN = Minnesota
- M = mid-season
- ML = late mid-season
- df = double fan

Note: Height measurements are from the ground to the top of the dead scape and do not include the buds or flower, which can add 2-5" depending on the angle.
