

EMBRACED BY THE WIND

EMBRACED BY THE WIND TET 30718 (Free the Captives x Flying Purple People Eater) 8.5", 40", 4-way branching (range of 2-7), 20 buds (range of 14-28), Re (but not outside in MN), ML, Dor. Grape cranberry; faint lighter eye (sometimes faint dark lavender or purple grape) with some "feathering"; chartreuse throat. Unusual form crispate with pinched petals and sepals. Impressive clump. Not sure about fertility since it has always an outside plant and I do my hybridizing primarily in the GH. Lined out outside because of its dormancy, so it will be sent late May/early June
