SOURCE OF STRENGTH

SPEAK THE TRUTH

FROM EVERLASTING TO EVERLASTING

TOGETHER IN PARADISE

DON'T WORRY ABOUT TOMORROW

PRECIOUS IN HIS SIGHT

NOT HOME YET

EVERY ONE TO HIS OWN WAY

2027 INRODUCTIONS

ACQUAINTED WITH GRIEF TET 0819 (Written in Stone x Ruler of Nations) 6" (to 6.5"), 29" (range of 27-34"), 4-way branching (range of 2-5), 20 buds (range of 8-28), instant rebloom outside in Minnesota ranges from some to all depending on the year, EM, Sev, CMO, EMO. Black cherry, indented cranberry pink eye with small white midrib through the eye, cranberry pink plus ivory edge, green throat. Saturated color that holds in the sun; very consistent blooms. Terrific parent for fancy kids with saturated color (see pics) …….$135DF

DON'T WORRY ABOUT TOMORROW TET 18520 (Entwined in the Vine x Rainbow in the Clouds) 8.5" (range of 8"-9"), 37" when mature (range of 30-40" in the clump) and 24" in new plants, 4-way branching, 22 buds (range of 16-25), sporadic instant rebloom outside in MN (and lots in 2026 into October), late mid to Late (registered as L since the late mid option was missing on the form), Dor. Slight reverse bitone with ivory petals and pale pink sepals, indented eye pattern with dark cherry etching plus mix of purple and dark and light lavender, grape plus lavender plus ivory triple edge, green throat. Different looks and colors and substance depending on the weather. Super scape and a perfect foliage here including very late in the season when lots of things have dreadful brown leaves. So what's not to like? Although I show lots of great pics on the website, at the end are a couple of pics that show the days when one or more petals will curl or not open well and it does that more often than I am happy with on an introduction – but the other days capture my heart enough to make up for it. That said, the 9th picture on the website was taken on September 25, 2026 at 60 degrees on a cold windy rainy day (and colder night) and it opened perfectly and scapes are still coming!. Fertile both ways (see pics of a couple of kids) but I rarely used it since it was always an outside plant and I don't have many eyed things to cross it with. Sorry, no clue what it can do. Lined out outside because of its being a dormant, so it will be sent late May/early June…….$100DF

EVERY ONE TO HIS OWN WAY TET 36518 [Book of Life x (sdlg x Desire of Nations)] 6" (to 6.5"), 40" when mature (range of 33-44" depending on the year), 5-way branching (range of 4-7), 35 buds (range of 18-42 when mature), lots of instant Re some years outside on MN (sometimes 70%) and less in other years, LM (and usually blooms until early or even late September depending on the year), Sev (with lots of dormancy), not a good CMO. Showy, strong scapes, loads of bloom, holds up well in the rain. Lavender pink bitone, indented ivory gray lavender eye and edge plus ivory and yellow, yellow to green throat. Color varies a lot with the temperature. Fertile both ways but it has always been an outside plant so I didn't use it in hybridizing. Lined out outside because of its almost being a dormant, so it will be sent late May/early June……$75DF

FROM EVERLASTING TO EVERLASTING TET 29516 [(sdlg x Irreconcilable Differences) x Pray Without Ceasing] 6" (to 6.5"), 30", 4-way branching (range of 3-7, and average of 5-way summer 2026 on outdoor lineouts), 17 buds (range of 10-30), lots of instant rebloom outside in Minnesota in 2026 (resulting in nearly 7 weeks of bloom) but almost none in other years (especially if crowded), EM, Dor, CMO. Pale cranberry, gray lavender eye and edge plus ivory and yellow, chartreuse throat. Hardy, robust, wonderful face and branching – an overall strong plant. Always an outside plant so I didn't use it in breeding until 2025. Pod fertile but not easy; not sure about the pollen since I never tried it. Lined out outside because of its being a dormant, so it will be sent late May/early June……$135DF

NOT HOME YET TET 33618 (sdlg x sdlg – both complicated) 6.5", 28" (location and weather dependent – mature clump 32" in 2026), 4-way branching (range of 3-6), 20 buds (range of 11-30), instant rebloom on 50% in 2026 display clump here in MN but some years none, late mid to Late, Dor. Dark pink, icy pink watermark, icy pink plus yellow ivory ruffled edge, yellow to green throat. Very hardy. Flowers have great substance and perform well in the rain. Fertile both ways and beautiful kids in several different colors (see pics).. $175 large SF (or possibly a medium sized DF if some singles turn into doubles by spring)

PRECIOUS IN HIS SIGHT TET 28318 [(Deep Waters x Strength to Endure) x sdlg 14917] 6", 28". 4-way branching (range of 2-6), 20 buds (range of 11-33), only sporadic instant rebloom outside in MN, M, Sev. Not a CMO but good later in the morning on cold days. Cranberry pink bitone, icy ivory pink eye and edge plus pale butter yellow, yellow to green throat. Fertile both ways and easily pod fertile (see pics of kids)……$100DF

SOURCE OF STRENGTH TET 23416 (Joy Came Down x sdlg) 6.5", 27" (range of 24-33"), 3-way branching (range of 3-6), 17 buds (range of 11-27), instant rebloom on almost 100% outside in MN except in one super drought year where there was none, M, Sev (but almost dormant), CMO, EMO. Stats listed are an average over the years and are location dependent. Its best year was in 2026, where the outside lineouts in a sunny well-watered location averaged 5-way branching with 20 buds and 100% instant rebloom. Pinkish red (sometimes dark pink and often a bitone – see pics), icy pale gray lavender eye and edge plus ivory, green throat. Good form, wide segments, good color, good foliage, good rain resistance. Not a super-fast increaser. Fertile both ways with easy pollen and only easy to set on in moderate temps. Makes beautiful red kids with ruffles and chalky eyes (see pics!). Lined out outside because of its almost being a dormant, so it will be sent late May/early June……..$175 DF

SPEAK THE TRUTH TET 27118 (Joy Came Down x Ruler of Nations) 5.5", 30" (range of 27-36"), 3-way branching (range of 2-5), 15 buds (range of 9-20), instant rebloom on 33%-90% outside in Minnesota depending on the year, M, Dor, CMO, EMO. Lavender pink, gray lavender eye and edge plus ivory, yellow to green throat. Sometimes has extra tissue that makes it even more interesting (see pics). Fertile both ways (see pics of kid). Lined out outside because of its being a dormant, so it will be sent late May/early June ……$100DF

TOGETHER IN PARADISE TET 24420 [Blood of the Martyrs x (For Better for Worse x Irreconcilable Differences)] 6.5", 28" (range of 24-31"), 5-way branching (range of 2-5 way) 22 buds (range of 10-28 and lower if crowded), usually lots of instant rebloom outside in MN, EM-M, Sev (but loads of dormancy), CMO. Black cherry, ½ white midribs on petals, lavender pink eye and edge plus yellow ivory ruffles, green throat. Fertile both ways and superb parent for fancy hardy kids (see pics). Lined out outside because of its almost being a dormant, so it will be sent late May/early June ……$150DF

2003-2026 INTRODUCTIONS (all Tets, DF unless noted) (2027 Intros are listed above)

NOTE: If there is something I’ve introduced that is not on this list that you have your heart set on, please let me know.
I often have one or two of a plant available, or I might be able to take it off a display clump – or even divide up a whole clump if I get a lot of requests.

Definitions:.
fr = fragrant
Dor = dormant
Sev = semi-evergreen
Ev = evergreen
Tet = tetraploid

Re = rebloomer
EMO = early morning opener
CMO = cold morning opener
MN = Minnesota
M = mid-season
ML = late mid-season
L = late season
DF = double fan
Note: Height measurements are from the ground to the top of the dead scape and do not include the buds or flower, which can add 2-5".

SALES INFORMATION: Each order is important, and I personally choose and box each plant. Plants are state-inspected. Shipping is by priority mail in May and June (plus I can do September shipping to the south). $15 for the first plant and $3 for each additional plant. A check or money order should be made payable to Springwood Gardens. U.S shipments only. Prices are for a double fan or more. I ship large plants, although sometimes the size is weather or cultivar dependent. I promise you will be very happy with the size of your order as a whole☺ All Springwood introductions have been grown and tested outside before selection. They are not babied or given special care. They are planted on top of a cold, windswept hill with almost no snow cover. The ground around the daylilies is covered with a couple of inches of hardwood bark for weed control. They are given at least an inch of water a week during the growing season and only rarely any fertilizer. During bloom season, nights are typically in the 60's and days in the 80's and 90's, but in making evaluations, I also watch how the flowers open when temps are in the 50's. Most of the dormants are lined out outside. The semi-evergreens are lined out in the greenhouse (where they are grown in the ground in raised beds, receiving only regular fertilizer and water and sprayed for insects as needed), enabling you to receive large, high quality, blooming size plants when it's most convenient for you in the spring. I recognize that not everyone is enamored of plants grown in greenhouses, but in our climate it's often the only way I'm able to ship before early June! Bloom occurs in April and May in the greenhouse, and it is likely you will receive a plant that has already scaped (happy to send scapes for pollen if I have them). Most buyers report first year bloom (and often rebloom) on the majority of the plants that I send, although not usually in sync with their peak bloom time. Northerners will find that their plants will re-establish more quickly if they request delivery after the soil has warmed up in their area and after hard frosts are expected. I guarantee my plants for a year – see above or the order form for specifics.

GUARANTEE: Springwood Gardens' introductions are guaranteed for a year in zone 4 and higher if: they are planted well before fall frost and grown in normal garden conditions (e.g. grown in the ground rather than in pots, not in standing water, watered as needed, soil not overly compacted); bark or other mulch is put around the plants to keep the roots cool and moist (no extra winter mulching needed); plants are not divided when first received or during the first year. (Note: it's best to avoid dividing or transplanting daylilies when they are stressed by high temps or drought, and northerners report better success dividing daylilies in spring or early summer, rather than in the fall.)

CLUB PRICING: Clubs will receive at least twice catalogue value if the plants are my choice based on availability, but they will come from your long wish list. Because of the discounted price and the plants going to so many different people, the one

year guarantee is not applicable.

GIFT PLANTS: Rather than sending gift plants, my practice has been to keep prices reasonable, send large plants, and send extra fans (if available) on larger orders since that is what most people seem to prefer.

VISITORS: Peak bloom outside is usually mid-July through mid-August. Visitors are welcome by appointment, and I'm happy to do formal tours for groups of 10 or more.
