EVERY ONE TO HIS OWN WAY

EVERY ONE TO HIS OWN WAY TET 36518 [Book of Life x (sdlg x Desire of Nations)] 6” (to 6.5”), 40” when mature (range of 33-44” depending on the year), 5-way branching (range of 4-7), 35 buds (range of 18-42 when mature), lots of instant Re some years outside in MN (sometimes 70%) and less in other years, LM (and usually blooms until early or even late September depending on the year), Sev (with lots of dormancy), not a good CMO. Showy, strong scapes, loads of bloom, holds up well in the rain. Lavender pink bitone, indented ivory gray lavender eye and edge plus ivory and yellow, yellow to green throat. Color varies a lot with the temperature. Fertile both ways but it has always been an outside plant so I didn’t use it in hybridizing other than to test its fertility. Lined out outside because of its almost being a dormant, so it will be sent late May/early June.
